PROJECTS

Film Streams' Student Night

Sep 2017 - Oct 2017

Updated a data & attendance tracking application for the Film Streams' organization to include additional data and functionality, including the ability to clean and modify information and export information into different formats. Added functionality to allow the application to effectively work for multiple locations upon the opening of Film Streams second location, and provided views for new types of data.

SUMMARY

I am a young individual eager to dive into the professional world. As a recent Omaha Code School graduate, my goal is to work in a positive environment alone, and with a strong group. I have always had a great interest in technology and find it as a great outlet for many of my other creative interests. Over time, I hope to become an integral part of something greater than myself, and to always continue my learning and understanding.

SKILLS

HTML, CSS, JAVASCRIPT, DOM MANIPULATION, SQL DATABASES, AND RUBY INCLUDING THE RAILS AND SINATRA GEMS, DSLR PHOTOGRAPHY, OFFSET PRESS, CPR/AED CERTIFIED:
